			Detailed changes to	DoD 2003								
Component	Location	Facility	Reason for change	GSF (Thousand)	Electricity (BBtu)	Fuel Oil (BBtu)	Natl Gas (BBtu)	LPG / Propane (BBtu)	Coal (BBtu)	Steam (BBtu)	Other (BBtu)	Total (BBtu)
Air Force	Arnold	AEDC Cooling water sys	Cooling water supports testing equipment and is not significantly influenced normal energy conservation methods. This is a national security function.	-66	-101	,						-10°
Air Force	Eglin	Climatic Lab	Facility used for equipment testing and is not significantly influenced normal energy conservation methods. This is a national security function.	-203	-56							-56
Air Force	Dover	Approach Control	Radar and communications equipment is not significantly influenced normal energy conservation methods. This is a national security function.	-7	0							(
Air Force	Dover	Telecom	Facility used for communications equipment and is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	-24	-5							
Air Force	Dover	Test Cell	Facility used for equipment testing and is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	-5	0							
Air Force	MacDill	Satellite Communications	Facility used for communications equipment and is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	-5	-1							-4
Air Force	MacDill	FAA Radar	Radar and communications equipment is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	0	-1							-1
Air Force	MacDill	Communications facility	Facility used for communications equipment and is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	-43	-4							-4
Air Force	Travis	Telecom	Facility used for communications equipment and is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	-7	0							(
Air Force	611 ASG	Radar and Support Equipment	Radar equipment is not significantly influenced normal energy conservation methods. This is a national security function. Moved from Goal to Excluded.	-135	-47							-47
Army	Multiple	Multiple	Actual FY03 baseline square footage data imported from Army's official Real Property Inventory database, consistent with methods for importing FY07 KSF data. Prior, data was reported subjectively by installation energy managers. Also corrects errors in 2003 data found since previous corrections.		249.5	53.5	717.4	46.9	93.0	5.2	-59.0	1106.
· ····j	папріо	ampro	Total revison for FY 2007		35	54						
			TOTAL TEVISOR FOR ZOUT	-36,694	35	54	/1/	47	93	5	-59	692
			- reflects change to goal category. AF data was moved from Goal to Excluding Army data is correction and affected only
